

GEO WEIGHTS

Enhancing Geothermal Loop Installation with Sustainability in Mind!

Crafted from upcycled materials for a greener Earth, our Geo Weights embody environmental responsibility. With an unparalleled commitment to reducing the carbon footprint, these weights are your eco-friendly choice for geothermal loop installations.

Engineered with precision, each weight features coned and domed ends, elegantly paired with certified lifting/connecting eyes for uncompromised functionality and safety.

Seamless compatibility is at the core of our design. Geo Weights seamlessly integrate with loops from all leading manufacturers, and with the ingenious use of straightforward shackles, multiple weights can be effortlessly interconnected, providing the flexibility your installation demands.

Their slim design with a conical end ensures smooth and easy installation. They can also be shackled together for additional weight when required.

GEOWEIGHTS ARE PROUD TO HAVE HELPED INSTALL THOUSANDS OF GEOTHERMAL LOOPS GLOBALLY!

Our standard offering includes 40kg (88lbs) weights with an 88.9mm (3.5") diameter.

However, customization knows no bounds in our world. Be it weight or length, we're poised to craft Geo Weights that perfectly align with your project's unique requirements.

GTD WEIGHTS ARE DESIGNED & PRODUCED IN-HOUSE
